Subject index to Volume 47

absorption, *see also* atomic absorption spectroscopy
absorption of magnesium 47
aminopeptidase N 54
antibiotic 31
atomic absorption spectroscopy 1
Bacillus cereus 61, 63, 71, 79, 89, 105
bacteria, *see also Bacillus, Bifidobacterium, Enterococcus, Lactococcus, Listeria*
bacterial genetics 42
bacteriological methods 23
bacteriology 177
behaviour of consumers 167
beliefs 167
Bifidobacterium 151
breeding of cattle 46
calcium in diet 48
carcinogenesis 48
cattle breeding 46
chain reaction, *see* polymerase chain reaction
cheese bacteria 145
cheese ripening 41, 55
citrate 42
colon carcinogenesis 48
communication with consumer 172
concentrated skim-milk 51
consumer behaviour 167
consumer communication 172
content of fat in milk 167
cross-flow microfiltration 121
curd fusion 137
dairy cattle 46
dairy products 176
dairy sector 174
diarrhoeal factor 105
dietary calcium 48
drainage of curd 137
economics of dairying 174
Enterococcus durans 145
Enterococcus faecium 145
enterotoxin 63, 79
environmental protection 175
enzyme, *see also* aminopeptidase N, esterase, papain, pepsin, peptidase
enzyme reactions, *see also* esterolysis, polymerase chain reaction, proteolysis
esterase 145
esterolysis 145
European food law 171
fat in milk 167
fermented milk products 151
filtration, *see* cross-flow microfiltration
flavour of dairy products 176
food law, *see* European food law
fouling of microfilters 121
fracture stress 137
fusion of curd 137
genetics of bacteria 42, 54
growth of bacteria 151
heating of milk 15, 51, 165
human diarrhoea 105
human nutrition 47
keeping quality 176
α-lactalbumin 15
lactate 42
Lactococcus 41, 54, 55
ß-lactoglobulin 15
lactose reactions 165
law, *see* European food law
Listeria monocytogenes 15
magnesium absorption 47
manganese 1
mesophilic citrate-fermenting lactic acid bacteria 42
methods in bacteriology 23, 79
microbial spoilage 177
microfiltration, *see also* cross-flow microfiltration
milk, *see also* raw milk, skim-milk
milk powder 1
milk products, *see also* fermented milk products
- 3.6.3
Mulder, Hendrik, 1907–1993 iii
nutrition 47
obituary iii
packaging 175
papain 15
pepsin 15
peptidase 41
polymerase chain reaction 23
polymorphism of proteins in milk 42
probiotics 151
protein, *see also* lactalbumin, lactoglobulin
protein in whey 15
protein polymorphism 46

proteolysis 15, 55
quality, *see also* keeping quality
quality of milk 31
quality management 172
raw milk 31
reaction, *see also* enzyme reaction
reactions of lactose 165
returnable packaging 175
ripening of cheese 41
selection of milk 167
sensory response to milk 167
serology 89, 105
shelf-life 178
skim-milk 51
spectroscopy, *see* atomic absorption spectroscopy
spoilage 177
statistical analysis 121
sulfonamide 31
survival of bacteria 151
toxicology 105
toxin, *see also* enterotoxin
toxin production 71, 89
trade barriers 171
whey 121
whey protein 15
Zeeman correction 1
